

LATIFA KHALID ALANAZI

Software Engineering Graduate | Frontend Development

Hail / Riyadh, Saudi Arabia | +966554135613 | latifa.k.alanazi@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience in Frontend Development building responsive web applications using Angular and TypeScript. Skilled in collaborating within Agile environments to streamline development workflows. Leverages software testing as an additional strength to validate system behavior, design comprehensive test criteria, and deliver reliable, high-quality software solutions.

EXPERIENCE

Quality Assurance Intern

(7-Month Internship)

JODAYN Information Technology Company • Hail, Saudi Arabia

- Executed comprehensive test cases, analyzed software behavior under multi-user scenarios, and documented critical defects with detailed reproduction logic.
- Collaborated closely with cross-functional development teams during defect investigation to verify successful patch implementations.
- Validated endpoint functionality and API integration criteria using Postman alongside automated script execution practice via Playwright.
- Aligned testing procedures with SDLC, STLC, and Agile methodologies to optimize overall software release quality.

TECHNICAL PROJECTS

SparkHub System

Graduation Project | Team Project

- Developed responsive Angular interfaces using TypeScript to optimize frontend performance.
- Built reusable UI components ensuring visual and structural consistency across the application.
- Integrated modular frontend pages seamlessly with core REST APIs for real-time data binding.
- Improved routing logic and resolved interface rendering issues to maximize application stability.
- Collaborated within a synchronized team structure using Azure DevOps for source tracking and agile sprint management.

BuggyBank

Personal Project

- Developed an interactive banking web application that intentionally simulates realistic software defects, enabling QA engineers and software testers to practice identifying, reproducing, and reporting software issues.

Quality Hub System

Personal Project

- Engineered a concise web platform for streamlined Test Case Management and Bug Tracking utilizing Flask and SQLite. Incorporated full CRUD workflows to manage test case lifecycles, execution logs, and historical defect records.

TECHNICAL SKILLS

Frontend Development Angular, TypeScript, JavaScript, HTML, CSS, Responsive Web Design

Software Testing Manual Testing, API Testing, Playwright, Postman, Test Case Design, Defect Reporting

Development Tools Git, GitHub, Azure DevOps, VS Code

Additional Skills REST APIs, SQL (Basic), Flask (Personal Project)

EDUCATION & CERTIFICATIONS

Bachelor of Software Engineering

2021 - 2026

University of Hail • GPA: 3.342/4.00

- ISTQB Certified Tester Foundation Level (CTFL) - Issued by ISTQB
- Agile Project Management - Alison
